Hello John,

I am following up on the above two items that the Division is awaiting information on:

The first is the Geotechnical report that we requested as part of your east side expansion Significant Revision. We received the attached letter from Simplot last September 2015 stating that the report would be completed by no later than mid-March and stamped by a Utah P.E. Can you please provide the Division with that report as we are now past the deadline for it?

Secondly, our November 16, 2015 approval letter (see attached) for the vegetation monitoring report requested an amendment to provide the Division with an amendment to the tailings reclamation plan to provide us with a reclamation scenario with the greatest shrub cover as the final revegetation plan for the tailings impoundment.

Thank you, John. Please give me a call if you have any questions regarding these matters.

Best regards,
April
